Do you feel you and your practice can benefit from greater cultural awareness and free CMEs? If so, contact the Illinois Foundation for Quality Health Care's (IFQHC) Physician Office department and ask about the Practice Cultural Quality initiative.

The Practice Cultural Quality initiative and the associated Culturally and Linguistically Appropriate Services (CLAS) training modules provide cultural competency training that can help improve doctor-patient communication and lead to more successful outcomes, more satisfied patients, lower costs and even lower liability. All IFQHC consultative services are offered at no cost.
